Children's Vision Day: Bringing Our Community Back Into Focus

In Partnership with

Our Goal

At Nicklaus Children's Hospital our vision is to create a healthy future for every child. Nicklaus Children's and community partners are excited to bring the community back into focus after an especially challenging year by supporting children's eye health. We believe every child in South Florida should have the opportunity to develop his or her full visual potential and beyond. WE SEE YOU and are here for you so they can thrive in and out of the classroom!

Why Focus on Eye Health

- Approximately 80% of learning is visual and there is a gap in access to timely vision screenings, glasses, patchings and surgery.
- A child's vision forms by the age of 10, and 60% of visual impairment is preventable with appropriate interventions to improve a child's vision and quality of life.
- Without regular eye check-ups, undiagnosed eye issues impact learning and behavior and could worsen as adults.
